

# Nebraska On-Farm Research Network

**Year:** 2001

**Title:** Late Season Nitrogen Application

**Crop:** Soybeans

**Study ID:** 057053200101

**County:** Dodge County

**Objective:** To determine and document the effect of late season nitrogen fertilizer application on the profitability of producing soybeans

**Treatments:** No nitrogen fertilizer vs. 30 lbs N/acre (28-0-0) applied in irrigation water

## Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.

University of Nebraska–Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture.
