

Nebraska On-Farm Research Network

Years:	2009
Title:	Nutrisphere Product Testing
Crop:	Corn
Study ID:	058053200902
County:	Dodge
Objective:	To determine & document the effect of replacing commercial fertilizer with alternate products on the profitability of corn production
Treatments:	This treatment had 9-15-4-3-.05 starter applied. Nutrisphere applied at 1/2% by volume rate with liquid nitrogen.

Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.
