

Nebraska On-Farm Research Network

Year: 2004

Title: Fungicide Seed Treatment

Crop: Soybeans

Study ID: 067155200401

County: Saunders County

Objective: Growing soybeans with and without broad spectrum fungicide treated seed.

Treatments: No seed fungicide vs. fungicide (ApronMaxx) treated seed.

Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.

University of Nebraska–Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture.
