

Nebraska On-Farm Research Network

Years:	2006
Title:	Insecticide Treated Seed
Crop:	Soybeans
Study ID:	093053200601
County:	Dodge County
Objective:	To determine & document the effect of using insecticide treated seed to control Bean Leaf Beetle on the profitability of soybean production.
Treatments:	Non-treated seed vs. CruiserMax treated seed.

Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.
