

Nebraska On-Farm Research Network

Years: 2003

Title: Normal Planting vs. Early Planting Date

Crop: Soybeans

Study ID: 098155200301

County: Saunders

Objective: To determine and document the effect of early planting date vs. normal planting date on yield and profitability of producing soybeans

Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.

University of Nebraska–Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture.
