Years: 2005

Title: Strip-till Crop Production

Crop: Soybeans

Study ID: 108155200503

County: Saunders

Objective: Determine and document the effect of strip tillage on the profitability of crop production.

Treatment: No-till vs. strip-till (spring operation)

Nebraska Soybean & Feed Grains Profitability Project

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture.

University of Nebraska–Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture.
